

DAILY LOG

Office of the Deputy Director

Date 1 July 1963

1. OCI memorandum states Brazilian President Goulart is interested in meeting with President Kennedy to counteract accusations that his regime is tainted with communism and to complain US is denying support necessary to Brazil. Memo has been sent to Kaysen, OCI 1578.
2. OCI memorandum (ostensibly a correction to an earlier Checklist) hints that available evidence now points strongly to Khrushchev having made a quick trip to Bucharest on 24-25 June.
3. Memorandum from General Maxwell Taylor: Sec Def on 21 June approved disestablishment of Joint Staff Intelligence Directorate. J-2 functions transferred to DIA. D/DIA will assume USIB responsibilities. ER 5288.
4. Memorandum for Record of further action under NSC Action 2454 (studies to determine releasability of mapping to create wider public acceptance of space observation and photographs). General feeling is that it is too risky to release satellite photography.
